Attention - Before Installation

Thank you for choosing from among Blu's quality line of products. We recommend that you carefully read this installation guide to ensure your unit's proper operation and reliability for many years to come.

NOTE: Product is already optimized/preset for best drawer fitting - only minor adjustments may be needed. Adhere to all local building and plumbing codes. The diagrams in this guide are not construction plans. They are visual aids.

Installation Requirements

Please read the instructions carefully so as to avoid any damage to the fixture.

1. To ensure this product is installed properly, you must read and follow these guidelines.
2. The owner/user of the product must keep this information for future reference.
3. Consult local building codes to make sure the installation complies with standards.
4. Remove the unit from its packaging. Before disposing of it, inspect the unit to make sure its in good shape. Should inspection reveal any damage or defect in the finish, contact your distributor. The warranty does not cover damages or defects in the finish once it has been installed. Blu Bathworks' responsibility for shipping damages ceases upon delivery of the product in good order to the carrier. All complaints regarding damage due to transport must be made directly to the carrier.
5. Place the unit in the bathroom before you start working. Conserve all nuts and bolts.
6. To protect the unit during installation, we recommend that you lay a piece of cardboard on the bottom.
7. If the unit is covered with polyethylene protective film, do not remove until installation is complete to grant maximum protection. However, remove film where any two surfaces will be in permanent contact.
8. Verify that all dimensions on the plan are the same as the ones of the unit.

51 M2 Mirror Installation:

Disconnect electrical power from the main switchboard

Secure wall hangers as shown above

- At least 2 studs required
- Use (A) in applications with no third stud

Secure the rest of the hangers using a level

51 M2 Mirror Installation continued:

Connect cable (1) from the capacitive switch to the transformer (G) paying attention to the + and - signs of the two poles

Connect clamp (H) with cable (2) of transformer (G) and cable (3) of the household power

Close the clamp and fix it as shown in the drawing

Install the mirror making sure the wall hangers are perfectly attached to the mirror back frame channel

In case the mirror is not leveled:
 - Remove the mirror carefully
 - Adjust mirror inclination with screw (E),
 screwed into the lower part of hanger (C)

NOTE: mirror can be mounted vertically following the instructions as above.
